Projects Details

Work Experience: (SAP ABAP Technical Analyst)

NRS Consulting (Gurgaon)

Project Type: Support

Client: JMBAXI Group

Version: SAP S/4HANA Private Cloud

- Optimized **MSME Report** by enhancing logic to reduce execution time and ensure accurate data retrieval.
- Designed and developed **Inventory Ageing Report and Customer Master Report** from scratch, enabling client friendly data access.
- Customized PO Print **Adobe Form** and Service PO Print Form to meet client-specific requirements, including tax calculation corrections.
- Implemented **Badi ME_PROCESS_PO_CUST** for transactions **ME22N** and **ME52N** to validate start/end dates, enforce authorization checks, and trigger appropriate warning/error messages for PO & PR releases.
- Enhanced **Purchase Register** report by adding multiple fields and resolving total amount calculations; applied modifications to **IGSTR Report**.
- Strong working knowledge of **User Exits, BADIs, Enhancement Spots** (implicit & explicit).
- Worked on **User Exit MV45AFZZ** to validate payment terms at sales order level, ensuring alignment with customer master and enforcing error handling.
- Developed BP (Business Partner) Uploader T-Codes for create and change operations using **BAPI**, simplifying mass data uploads.

Client: GS Express

Project Type: Support

Version: SAP S/4HANA Public Cloud

- Implemented enhancement in Purchase Order process to make **Material Description field non-editable**, ensuring it always matches Material Master Data across all PO document types.
- Configured and validated **custom fields** in Purchase Order process by making **Gate In Date** and **Gate In Number** mandatory, along with additional fields like **Transport Name, E-way Bill Number, Vehicle Number, and Weighbridge Slip**.
- Enhanced **Adobe Forms using ADLC** by adding custom fields and modifying layouts to display **tax details** as per client requirements.
- Developed **Input GL and Output GL reports** using custom **CDS Views and Analytical Queries**, and created a **Fiori application** to display the reports.
- Enhanced the **Supplier Aging Report** to display accurate and client-specific data.
- Implemented a **validation in PR to PO conversion** process to ensure that the **Purchase Requisition (PR) type** matches the **Purchase Order (PO) type**.

Project Type: Implementation

Client: Hind Carriers Private Limited (HCPL)

Version: SAP S/4HANA Private Cloud

- Developed and enhanced **Adobe Forms** using Adobe LiveCycle Designer with dynamic formatting and **Form Calc** logic.
- Integrated **Adobe Forms** with ABAP driver programs for output generation and printing.
- Developed RAP applications using **CDS View Entities and Behavior Definitions**.
- Implemented validations, determinations, and custom error handling in RAP business objects.
- Worked with CDS Views, associations, and annotations for data modeling and reporting.
- Developed custom reports, **BDC programs**, and **BAPI-based solutions** across MM, SD, and FI modules.

Project Type: Support

Client: NSFTPL

Version: S/4 HANA Public Cloud

- Enhanced **Create Correspondence Report** by modifying existing logic, adding required fields, and removing unnecessary fields.
- Corrected net value and tax calculation errors in **Adobe Forms** by analyzing and updating the underlying logic.
- Implemented custom logic in **Custom Logic app for PO Type selection** to automate validations.
- Developed an **Adobe Form for Label Printing** to streamline invoice processing for packaging boxes.
- Implemented validation logic to make specific fields **mandatory in PR and PO**, ensuring data integrity.
- Developed **PR/PO Workflow Report** using **CDS Views, Table functions** and **AMDP**.

Project Type: Support

Client: APLL Vascor

Version: S/4 HANA Public Cloud

- Developed a **GSTR-2B report** using **custom CDS views** and **analytical queries**, and created a **Fiori app** to display the report.
